

SAAHIL DARISIPUDI

Saint Louis, MO, +1 (314) 305 - 4810, darisipudisaahil91@gmail.com, <https://www.linkedin.com/in/saahil-darisipudi-2a88b2217>

PROFESSIONAL SUMMARY

Graduate student pursuing an M.S. in Artificial Intelligence & Machine Learning at Saint Louis University, with hands-on experience in Machine Learning, Deep Learning, Computer Vision, and cloud technologies. Proficient in Python, Java, PyTorch, and data-processing frameworks. Experienced in developing ML applications, satellite-imagery pipelines, and interactive AI/ML demos.

TECHNICAL SKILLS

Programming: Python, Java, SQL, HTML, CSS

Machine Learning: Machine Learning, Deep Learning, Computer Vision, NLP, Transfer Learning

Frameworks & Libraries: PyTorch, NumPy, Pandas, Rasterio, Xarray, Dask

Tools & Platforms: AWS, Azure, Datadog, Git, Gradio, STAC, Microsoft Planetary Computer

Concepts: Object-Oriented Programming, IoT, Cloud Monitoring, Data Structures

PROFESSIONAL EXPERIENCE

Graduate Representative - Kyndryl Solutions Pvt. Ltd, Aug 2023 - Jan 2025

- Monitored 110+ enterprise applications using Datadog, AWS and Azure, reducing downtime through proactive incident alerts, Collaborated with CBRE Global D&T to optimize cloud system performance, Supported project management and client service delivery.
-

EDUCATION

Saint Louis University - Saint Louis, MO

M.S. in Artificial Intelligence & Machine Learning, Dec 2026(Expected)

GPA: 3.74/4.0 | Coursework: Machine Learning, Artificial Intelligence, Object-Oriented Programming using Java

Aditya Engineering College - Surampalem, India

B.Tech in Electronics and Communication Engineering, Apr 2023

GPA: 7.26/10 | Coursework: Embedded Systems, IoT, Computer Network, Data Structures

TECHNICAL PROJECTS

Satellite Image Change Detection | Ongoing

- Developing a deep learning-based change detection pipeline for identifying changes between multi-temporal satellite images.
- Working with satellite imagery preprocessing, image alignment, and change detection techniques for remote-sensing applications.

Wildfire Detection Using Satellite Imagery

Python, Rasterio, Xarray, STAC, Microsoft Planetary Computer, Dask, NumPy

- Built a satellite-imagery preprocessing pipeline for **wildfire detection**, including scene validation, cloud filtering, CRS-aware reprojection, and 6-band 224×224 tiling.
- Generated **18K+ satellite image tiles across 10 wildfire scenarios** as Cloud-Optimized GeoTIFFs (COGs) for efficient ML-ready data processing.

Warfarin Dose Prediction System, Machine Learning

[Live Demo](#)

- Built an end-to-end warfarin dose prediction system using KNN, Random Forest, Gradient Boosting, and Neural Networks with cross-validated evaluation.
- Deployed an interactive Gradio app on Hugging Face for real-time dose prediction with integrated preprocessing and model selection.

ClearPass AI - AI-Driven Interview Practice Tool

- Built a Java Swing GUI using CardLayout and integrated Gemini API + EdgeTTS for spoken prompts.
- Implemented session data models for Q&A tracking summary analytics.

Flowers102 - Image Classification using CNN

- Built and trained deep learning model to classify 102 flower species from images.
- Applied transfer learning (ResNet/VGG) and data augmentation for high-accuracy multi-class.
